Wash Basins with Hand Dryers

The EWG-TAP is ergonomically designed with touch-free operation, ensuring the maximum level of hygiene. After washing your hands, the integrated Dyson Airblade Tap hand dryer produces a powerful airflow for drying. A mixing valve enables you to configure the desired water temperature. The entire installation is made from hygienically-finished stainless steel. Standard delivery includes the pedestal with inspection shutter.

Wash Basins with Hand Dryers Features

- Conserves water
- No water left on the floor
